

CONCRETE CORING

VP200 VACUUM PUMP

 Husqvarna®

Model	VP200
Power	0.55Kw
Voltage	220-240V
Noise	84dBA
Suction	0.8 Bar
Weight	19kg

Husqvarna VP200 Vacuum Pump

The VP200 Vacuum pump is a secret unknown weapon when it comes to core drills and stands. Simply position your drill stand in its desired location, connect the pump to the vacuum base of the drill stand and turn on the vacuum pump. In a few seconds your drill stand will be 'sucked' firmly to the surface and you're ready to start drilling. Once you're done, disconnect the vacuum, reposition the stand for the next hole and start the process again.

The VP200 greatly increases productivity and often negates the need to anchor the drill stand with mechanical fixings, preserving the substrate and saving time in both setup and cleanup.
