Forza Pro 46" Trowel Machine

The Forza Pro 46" is a professional series trowel machine ideally suited to large commercial and industrial applications. With it's Honda engine, heavy duty gearbox and base, single piece balanced lifting hook, rack and pinion throttle lever and the adjustable handle bar, the Forza Pro 46 is built to last.

We've added a stabilising ring to further strengthen the base and we've extended the adjustable handle to enhance the control of the machine. The Forza Pro 46" is best suited to finishing large residential, commercial, industrial or high rise slabs.

The Forza Pro 46" can also be fitted with a GX390 13HP engine providing extra power and extra weight for finishing in warmer weather.

FIVE REASONS TO BUY **FORZA**

Over 10 years in the making...

Our forza machines are not just another off the shelf, they are the result of many years of testing and tweaking and we know what works and what doesn't. And... if you think there is a way to make it better, let us know and it may find its way onto the next model.

We'll modify the machine to fit your needs...

Need it to spin faster? Contrary to popular belief, putting a bigger engine on it does not make it go faster. We can fit a speed up kit to any of our Forza trowel machines to achieve this.

Need it to go slower? We can do that too!

We don't do light duty!

We've developed these machines to be tough and reliable. From the renowned Honda or Hatz engine, the heavy duty gearbox and base, the rack and pinion throttle lever and the folded single piece lifting hook, our machines live up to their name - Forza - Italian for Strength and Power.

The little green tag...

Every machine is run and tested before it leaves our doors. Once it has been tested it is tagged ready for use. That gives you peace of mind that the machine is right ready to be put to work.

We service what we sell!

With a fully functioning workshop, permanently staffed with a fitter and turner and fully qualified mechanic, we stand by and service what we sell. With fast turn-around times on standard repairs and servicing, you'll have your machine back in no time.
