Model	FS524
Engine	Honda GX690
Fuel Type	4-Stroke Petrol
Power	15.4kW
Blade Size (Max)	24" (600mm)
Cutting Depth	241mm
Weight	239kg

Husqvarna FS524 Push Saw

The FS524 is the smallest of Husqvarna's self-propelled range and is ideal for small to medium sized service and repair jobs. With a 24" blade fitted, the FS524 can cut up to 241mm through concrete, masonry and asphalt.

Despite its relatively compact size, the optimal power transmission makes it ideal for more demanding jobs. Features include; self-contained drive system, anti-vibration engine and shaft mounting system and an enhanced belt tensioning system.

The saw can be connected to mains water or utilise the onboard watertank for smaller tasks. The lifting hook is mounted centrally for safe and simple lifting for transport and movement around site.
