Maximum Flow	15,000 Litres / Hour
Maximum Head	11 Meters
Outlet	2" (50mm) FBSP
Weight	12kg
Dimensions	190mm x 190mm x 330mm

Flo-Kwip LC45A Electric Submersible Pump

The LC45A is a light weight but extremely portable electric pump for quick and easy dewatering. The polyurethane impeller and the abrasion resistant rubber wear plates are housed in a robust aluminum outer casing for optimum protection. The LC45A also comes with a float so if rain is predicted over night, the float will automatically activate the pump if the water level rises.

The unit also comes with a pull rope for controlled lowering in and out of holes. Please use this rather than the power cord as power cord damage will not be covered by warranty.
