Max RB398S - Battery Operated Rebar Tie Gun

The Max RB398S is a premium battery operated rebar tie gun that can tie up to a combined 39mm of rebar in just 0.5 seconds per tie. This makes it 5 times faster than manual tying and greatly reduces the risk of developing musculoskeletal disease. RB398S is the result of 6 generations of innovation since Max developed the first battery tie gun in 1993. The high quality Japanese tool is light weight and portable which allows for easy single handed operation. The RB398S comes with 2 Batteries, Charger, Belt clip and Plastic Carry Case.
