

ROLLER SCREED BATT SCREED 6000

The worlds first battery powered roller screed...

The Batt Screed is a patent pending battery powered roller screed. Powered by a rechargeable 60 volt, lithium ion battery, the Batt Screed boasts impressive power and run times. It eliminates exhaust fumes, power cords and hydraulic hoses found in traditional roller screeds.

The expandable tube inserts allow for easy transition between tubes from 0.9m to 6.5m. A three position handle folds and locks compact for lightweight transport. With a simple pull of two pins, one person can detach the screed from the tube in less than a minute.

ROLLER SCREED BATTSCREED 6000

Battery powered

No fumes, no cords, no hoses - pure battery power. The 60-Volt lithium ion battery for impressive power and run time.

Depending on the size of the tube and the type of battery, expect up to 60mins of use per charge.

Pivoting and Folding handle

The three pin position hand allows for different pulling positions for operator comfort and productivity.

The handle also folds flat and compact for transport.

Adjustable Tube Lengths

Thanks to the expandable tube inserts, the standard 114mm dia x 6.5 mm wall thickness aluminum tube can be cut to exact sizes to suit your specific job. The inserts lock to the tube using a clever compression fitting.

Backed up by warranty

The Battscreed 6000 is made in the USA and exclusively distributed by Allcon Group.

The unit is covered by a 1 year warranty and the batteries are covered by DeWalt's 3 year battery warranty.
