### **Rapidtool RTRB16E - 16mm Electric Rebar Bender**

The Rapid Tool RB-16 is a powerful electric rebar bender that is both light weight and portable. The RB-16 is powered by standard 240V Mains power and can bend 16mm rebar up to 90° in one motion.

The interchangeable head enables both tight and large radius bends, perfect for bending up ligatures and hoops or for bending rebar insitu.

The unit is packaged in a heavy duty steel carry case and comes complete with large radius heads, tools and a maintenance pack
