Amplitude (mm)	0.8	1.2	1.2	1.2	1.2
Frequency (rpm)	12000	12000	12000	12000	12000

### The heavy duty vibrator to meet the demands of the construction site.

Powered by a drive unit, the Forza range of flex shaft vibrators have been stringently tested and are a reliable vibrator for the most demanding of tasks. Available with a range of head sizes and shaft lengths, the forza vibrator will make short work of the toughest jobs.

We've also made it easy to keep track of the age of your shafts by concealing the serial number in the drive dog so it will never get covered with concrete.
