Husqvarna K4000 Cut-N-Break

The K4000 Cut-n-break saw is a unique twin bladed electric saw which can cut up to 400mm deep in concrete and masonry. The high speed blades cut a core which can easily be broken off using the accompanying breaking tool.

The K4000 has also been designed to enable flush cutting close to floors and walls. Due to it's unique blade configuration, overcutting at the corners can be avoided when cutting door and window openings.

Comes with a set of blades and the breaking tool.
