

# CONCRETE CUTTING EXHAUST VACUUM

**GUARDA**  
WORK HARD. BREATHE EASY.

Model	DSGEV
Capacity	90L
Power	2 x 1000W Motors
Air Flow	160L/M
Vacuum Suction	250mbar
Dimensions (LxWxH)	680mm x 600mm x 1400mm
Weight	34kg

## Guarda Exhaust Vacuum

The exhaust vacuum is an electric wet/dry vacuum to capture slurry and dust created when cutting using the Guarda Edge Cutter.

The vacuum allows for the attachment of up to 60m of exhaust hose so the vacuum can remain in close proximity to the cutting operations whilst moving the fumes away from the operator.

Powered by a standard 10A 240V power outlet, the Exhaust Vacuum can also be used as a standalone wet/dry vacuum.
