

DIESEL POWERED DRIVE UNIT

FORZA
DIESEL

Model	FDU1B20
Engine	Hatz 1B20
Power	1.4-3.5kW / 4HP
Weight	45kg

The Ultimate in Diesel power equipment...

We've put hundreds of hours of R&D in to these units to solve all the common issues of conventional diesel powered equipment. Starting with the engine, the Hatz B series engines are a very low emission engine which is simple to start.

The drive unit is mounted on a heavy duty welded protection frame with a dished base for easy maneuvering around site. The one piece folded lifting hook makes for quick and safe lifting and transporting.

With the low emission diesel engine, the drive unit is perfect for powering flex-drive equipment in confined areas such as tunnels and mines.
