Husqvarna X2000-Soffcut

The Husqvarna X2000 is a self propelled, dry cutting, petrol soffcut saw, ideal for medium to heavy-duty commercial, industrial and paving applications. The X2000 is designed for versatility, ease of use and high production capabilities. Three blade widths can be used, allowing for different joint widths and crack control.

The X2000 features, an air cooled 9HP engine with electronic key start, a hydrostatic transmission for propulsion and a roll cage with built in lifting hook for protection and safe lifting.
