Rotor Diameter	28" (700mm)
Engine	Honda GX35
Blades	4 x 24" (Specialty Blades)
Rotor Speed	25-70 RPM
Weight	28kg

28" Pole Trowel Machine

The light weight pole trowel machine connects to a bullfloat pole and enables finishing concrete from the edge of the pour.

At only 28kg, the pole trowel machine can begin finishing concrete much earlier than standard walk behind trowel machines and thanks for a nifty update, the throttle is now controlled by simply twisting the bullfloat handle.

The clip on stipple blades, create a great, consistent stipple finish and is ideal for finishing driveways, footpaths, and car parks.

FIVE REASONS TO BUY FORZA

Over 10 years in the making...

Our forza machines are not just another off the shelf, they are the result of many years of testing and tweaking and we know what works and what doesn't. And... if you think there is a way to make it better, let us know and it may find its way onto the next model.

We'll modify the machine to fit your needs...

Need it to spin faster? Contrary to popular belief, putting a bigger engine on it does not make it go faster. We can fit a speed up kit to any of our Forza trowel machines to achieve this.

Need it to go slower? We can do that too!

We don't do light duty!

We've developed these machines to be tough and reliable. From the renowned Honda or Hatz engine, the heavy duty gearbox and base, the rack and pinion throttle lever and the folded single piece lifting hook, our machines live up to their name - Forza - Italian for Strength and Power.

The little green tag...

Every machine is run and tested before it leaves our doors. Once it has been tested it is tagged ready for use. That gives you peace of mind that the machine is right ready to be put to work.

We service what we sell!

With a fully functioning workshop, permanently staffed with a fitter and turner and fully qualified mechanic, we stand by and service what we sell. With fast turn-around times on standard repairs and servicing, you'll have your machine back in no time.
