## Deck Chairs / Spacers

### DESCRIPTION

Deck chairs are an alternative to traditional wire or metal bar chairs and are used to support reinforcing in suspended decks, precast beams, panels and tilt-up applications.

Unlike steel chairs, they are strong and stable, light weight and will not rust. Deck chairs also a combination chair and feature two height settings and have dimpled feet ensuring minimum exposure on suspended and precast sections.

Bottom Deck Spacer

Top Deck Spacer

### FEATURES & BENEFITS

- Made in Australia
- Complies to AS/NZS2425:2015
- Light weight, stable and will not rust
- Dimples on the feet ensure minimum exposure on precast elements

### ESTIMATING & SIZES

Set-Up Deck bar chairs are packed in bags of 50 or 100 chairs depending on the size. Typically bar chairs are spaced at one chair per m2.
