Panel Chairs

DESCRIPTION

Panel combination chairs are designed to support mesh in precast, tilt up and some suspended deck applications. The chairs are specifically made from a concrete grey plastic and feature dimples at the base of the legs to provide minimum exposure ensuring the chairs can't be visible from the under side of the panel or deck.

Like standard combination chairs, they have two height settings and can be adjusted by simply turning the chair 90°. They also feature a push on clip mechanism which allows the chairs to swing in to place when the mesh is lowered in the form.

FEATURES & BENEFITS

- Made in Australia
- Complies to AS/NZS2425:2015
- Clip top makes for easy positioning of chairs
- Dimples on the feet ensure minimum exposure on precast elements

ESTIMATING & SIZES

Set-Up SOG bar chairs are packed in bags of 100 chairs. Typically bar chairs are spaced at one chair per m2.

Code	Concrete Cover	Pack	Packs/Pallet
