## Husqvarna LF100LAT Forward Plate Compactor

The LF100LAT is a fast-operating forward plate compactor for efficient compaction of asphalt, soil and gravel. The unique plate shape and optimised speed enable fast and easy compaction with high production rates. The exclusive, patented low-vibration handle protects the operator from unhealthy vibration levels and the compact design with foldable handle and wheels makes transportation and storage easy.

The LF100LAT also features a large water tank with a oversized refill cap enables faster and less frequent refills.
