

COMPACTION

LH700

 Husqvarna®

Model	LG504
Engine	Hatz 1D90Z
Fuel Type	Diesel
Vibration Frequency	53Hz
Travel Speed	30m/min
Weight	780kg
Plate Width	660mm
Dimensions (LxWxH)	1880mm x 660mm x 1180mm

Husqvarna LH700 Diesel Hydraulic Reversible Plate Compactor

The LH700 is a heavy duty diesel hydraulic plate compactor ideal for deep compaction on large civil and infrastructure projects. The full hydraulic system delivers the sheer power and capacity to compact medium to thick layers of granular soils - from sand to rock fill. The hydraulic drive also provides impressive ease of use - you can control the equivalent of a 10-Ton roller with the tip of your finger. The LH700 is powered by a powerful Hatz 1D90V diesel engine with electric start providing power and reliability with low emissions and low fuel consumption.
