Engine	Hatz 1D42S
Fuel Type	Diesel
Vibration Frequency	58Hz
Travel Speed	3.6km/h
Weight	765kg
Drum Width	650mm
Dimensions (LxWxH)	1110mm x 720mm x 1215mm

Husqvarna LP6505 Double Drum Roller

The LP6505 is a full hydraulic duplex roller, developed for compacting thin layers of granular soil and asphalt. The compact design with high curb clearance, no overhang and sleek sides allows you to go close to walls, posts or edges. Scrapers help keep the drums clean and hydraulic brakes with automatic breaking function for easy operation and higher safety. The hydraulic oil is also kept cool with the built-in hydraulic oil cooler reducing wear on components and prolonging service intervals.
