

Metal Form Tube

DESCRIPTION

Metal form tube is a light gauge, galvanized steel tube designed to be used as a permanent round column formwork. Simply install the columns and fill with concrete, that's it. The galvanized steel tube remains permanently around the column.

FEATURES

- Lightweight and cost effective
- Formwork doesn't need to be stripped
- No need to dispose of sacrificial formwork
- Galvanized steel for low maintenance
- Suitable for above or below grade applications
- Can be custom made to exact lengths and diameters

APPLICATIONS

- Forming round concrete columns and foundations
- Supporting pier holes in soft ground

ESTIMATING & SIZES

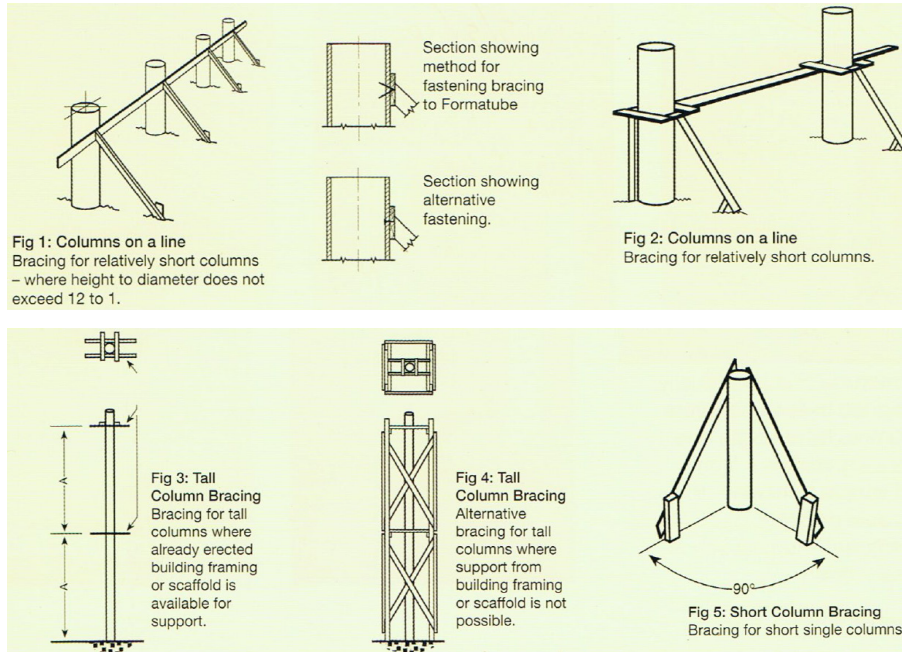

Item	Internal Diameter (mm)	Wall Gauge (mm)	Available Lengths
FTM150	152	0.6	Made to Order
FTM200	204	0.6	Made to Order
FTM250	254	0.6	Made to order
FTM300	305	0.6	3m/4m
FTM350	356	0.6	3m/4m
FTM400	406	0.6	3m/4m
FTM450	457	0.6	3m/4m
FTM500	508	0.6	3m/4m
FTM550	559	0.8	4m
FTM600	610	0.8	3m/4m
FTM650	660	0.8	4m
FTM700	711	0.8	4m
FTM750	750	0.8	4m
FTM800	812	0.8	4m
FTM900	914	0.8	4m
FTM1000	990	1.0	4m

Custom made lengths available.
Made to order MOQ - 20 meters

INSTALLATION

For above ground applications, form tubes must be braced to ensure they are plumb and secure.

Form tube is typically supplied in 3 or 4m lengths. It can specifically ordered to any length that is possible for transport.

STORAGE AND HANDLING

Take care while handling metal form tube as the edges steel will be sharp and could cause lacerations.

STRIPPING

Whilst formwork can be left in place permanently, metal form tube can also be removed by cutting the steel away with a grinder.

Allcon products are manufactured to the highest quality, and if used in the correct applications and in accordance with all directions, will produce quality and consistent results. However Allcon Group Pty Ltd accepts no responsibility for inappropriate usage or faulty workmanship by the end user.
