MaxWatt 4500W Inverter Generator

The GMW45i is the perfect portable power solution for the jobsite. With a max power output of 4500W and a continuous operation of 3700, the MX4500iS is perfect for powering jobsite tools such as grinders, drills, saws, lights - even those jobsite luxuries such as a coffee machine or microwave. It's also safe to charge sensitive electronic devices such as laptops, phones and battery chargers, thanks to the in-built digital inverter technology. If more power is required, two MX4500's can be joined using the parallel cables to provide a massive 9000W. With two wheels and a sliding handle, this unit provides real value and real power - right where you need it.
