Dimensions	770mm x 610mm x 730mm

### MaxWatt 8000W Inverter Generator with remote start

The GMW8i is currently the largest inverter generator in the MaxWatt range and is packed full of features. Digital Inverter generators feature pure sinewave technology making them perfect for powering sensitive electronic equipment such as computers and high frequency vibrators as well as general construction equipment. This unit is super easy to start thanks to it's electronic push button start and can also be started remotely using the remote control. The smart engine control also reduces engine speed depending on current load resulting in better fuel economy. With a 2 year warranty, the MaxWatt 8000W is the ultimate in portable power.
