

TROWEL MACHINE

CT36-8A-V

 Husqvarna®

Model	CT36-8A
Rotor Diameter	36" (900mm)
Engine	Honda GX240 (8HP)
Blades	4 x 36" (TBB36C, TBB36F, TBF36C)
Rotor Speed	25-200 RPM
Weight	95kg
Dimensions (LxWxH)	2005mm x 915mm x 1040mm

Husqvarna CR36-8A-V Walk Behind Trowel Machine

The Husqvarna CT36-8A is a high quality 36" trowel machine for professional concrete contractors. Powered by a GX240 (8HP) Honda engine and featuring a variable speed clutch this machine is ideal for slow speed panning and high speed finishing of small to medium sized slabs. The machine also features a quick pitch adjuster allowing the operator to pitch the blades from 0-30° in seconds.

The CT36 also comes with a suite of safety features to protect the operator and others in the immediate area should the machine get out of control. The transmission brake, electronic safety switch and the engine speed sensor work together to detect and bring the machine to a standstill within 3/4 of a turn if the machine is let go. Furthermore, the unit will not start unless the throttle lever is set to zero to prevent inadvertent rotation of the handle on start-up.
