Fuel	Petrol
Blades	8 x 46" (TBB36C, TBB36F)
Rotor Speed	165 RPM
Steering	Manual
Weight	333kg

Allen MP215 36" Ride-on Trowel Machine

The Allen MP215 might be Allen's smallest ride-on trowel machine but it is still a very capable, feature packed unit. Made in the USA, the MP215 is powered by a genuine Honda GX690 engine and is paired with a heavy duty drive train capable of both panning and finishing. Whilst being manual steer and manual pitch, the MP215 is also fitted with electric retardant sprayers fed from the on-board 23L tank.

Whilst the MP215 is predominantly an entry level machine, it's not out of place working along side larger riders as a dedicated panning machine. With its light weight and maneuverability, unit is also great for finishing larger suspended slabs. In short, the MP215 is an extremely versatile rider, perfect for entry level work, perfect for suspended slabs and a great partner for larger ride on trowel machines.
