Allen MP235 36" Edging Ride-on Trowel Machine

The Allen MP235 rider is a unique 36" ride-on trowel machine with patented rotating guard rings which allows you to finishing within 8mm of a wall or penetration. Made in the USA, the MP235 is powered by a genuine Honda GX690 engine and is paired with a heavy duty drive train capable of both panning and finishing.

Whilst being manual steer and manual pitch, this unit is super user friendly with push button start, electric powered spray system with foot activated control and four adjustable LED lights. The MP235 is also very easy to maintain with the central grease point, lift up seat and removable engine cover.

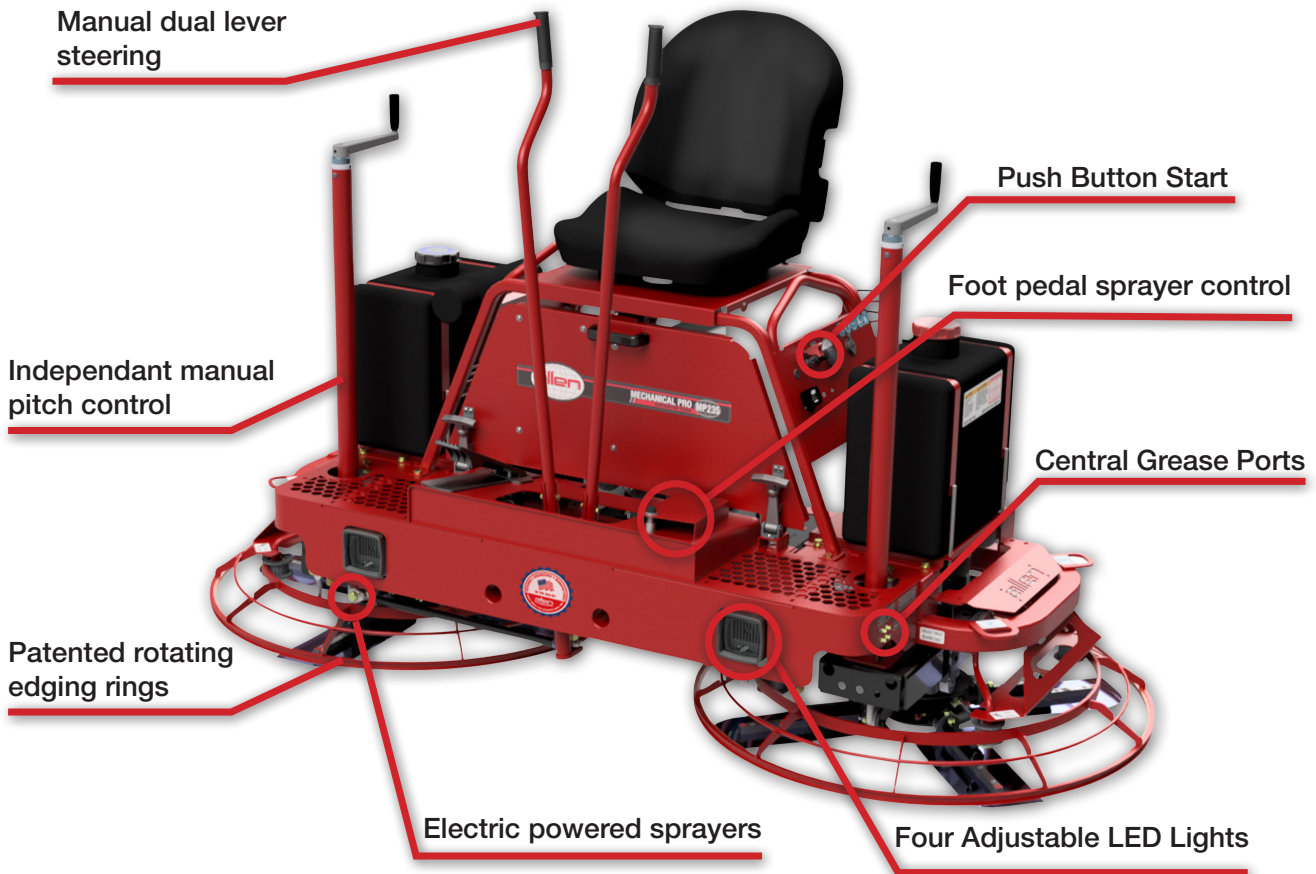

Whilst designed as a specialist edging machine, the MP235 can be used as a standalone panning or finishing machine or as a dedicated finishing machine when paired with other ride-ons for larger commercial or industrial slabs.
