Fuel	Petrol
Blades	8 x 46" (TBB36c, TBB36F)
Rotor Speed	45-165 RPM
Steering	Hydraulic Power Steering
Weight	377kg

Allen MP245 36" Ride-on Trowel Machine

The Allen MP245 is Allen's smallest power steer rider and is packed full of features normally found on larger riders. Starting with the drive train, the Honda GX690 transfers power to the heavy duty drive train through a torque convertor clutch. This allows the machine to pan as at as low as 45RPM and still finish at up to 165RPM. The machine also comes standard with retardant tanks, electric sprayers with foot operated control, LED lights and manual pitch control.

However, this unit is also bristling with creature comforts including; hydraulic power steering, push button start, adjustable seat and a 12V outlet for charging phones etc. The MP245 is truly a quality, top of the line machine with all the bells and whistles and is perfect for both panning and finishing large commercial and industrial slabs. It is also the perfect finishing partner to a larger dedicated panning machine.
