

DUST EXTRACTORS

DE120 VACUUM

 Husqvarna®

Model	DE120
Motor	2.2kW Single Phase 230V (15A)
Vacuum Suction	200mbar
Filter	H-Class HEPA (Certified to EN1822)
Weight	39kg
Dimensions (LxWxH)	815 x 542 x 1125mm

Husqvarna DE120 230V Dust Extractor

The DE120 is Husqvarna's next generation of dust extractors and is equipped with the latest HMI technology, e-flow system and the legendary Longopac® bag system. The 2.2kW motor makes this unit ideal for use with larger hand held grinding, cutting and drilling tools, floor grinders, shot blasters, scarifiers and more. The HMI and E-flow system work together to monitor performance and automatically adjust the air speed ensuring stable air flow, reducing energy consumption and extending filter life. The improved Longopac® attachment system makes it super easy to mount cassettes and ensures no dust gathers in the folds. It also features embedded connectivity that enables monitoring of location, run-time, service and filter status along with other usage data.
