

# SUBMERSIBLE PUMP

## SPFP2E SLUDGE PUMP

# FORZA

Model	SPFP2
Maximum Flow	72,000 Litres / Hour
Maximum Head	14 Meters
Shaft Length (m)	5m
Outlet	2" (50mm) Camlock
Weight	22kg

### Forza SPFP2E Economy Flex Drive Sludge Pump

The Forza SPFP2E is an economy version of our regular flex drive pump for dewatering construction sites, excavations, pier holes, dams and trenches. This sludge pump ideal for large contractors with a large number of crews.

The economy pump differs from our regular flex drive pumps in two areas; firstly, the flex shaft is 2m shorter and does not feature the sliding collar to protect the shaft. Secondly, the cast aluminium pump housing has been changed to a pressed aluminium housing.

Whilst not as resilient to abuse, this pump will still move some impressive volumes of water and sludge. The shaft is fitted with a standard 3-dog drive and can be powered by most petrol-powered drive units.
